1. Overview:

The Oasis is the first of its kind miXed-Reality Role-Playing Game” (XRRPG). Taking inspiration from all reaches of the physical and digital realms, the game is unlike any other. Through the power of blockchain-technology and storytelling, The Oasis has created a new form of social gamification. Imagine a large-scale version of Dungeons & Dragons where your rewards are ETH and NFT's. If D&D is too nerdy for you, imagine then a real life MMORPG, where outplaying your opponent means real life loot. If all that sounds like a foreign language – just remember this “The Best Giveaways in the Metaverse!”

The Oasis follows a “Holy Trinity” format where the Lore/Story>Challenges/Activities>Loot/Rewards all connect together for a new kind of immersive experience. Your engagement and activity to the community and the game world will be rewarded. Player choice will direct the path of the story that we will craft together, and the respective rewards that will be paid out. To date The Oasis has given out over 1,000 rewards comprised of crypto and various Flow/ETH NFT's. 50% of the revenue raised from the initial sale of The Challenger Tokens will be used to provide the giveaways for 4 seasons of content, which will be given away through daily and weekly challenges and activities.

2. Game Lore:

***Legacy lore can be found in legacy-lore channel of discord**

Our host here in The Oasis is ominously known only as "The Gamemaster." The Gamemaster (or GM for short) has been on a quest of his own trying to collect the World Keys – the most powerful artifacts in The Oasis. The GM was created to watch over the metaverse and its many inhabitants – known as Challengers. However, after the Third World Key crowned its Keyper (Key Keeper), The GM was forced to reset the timeline and vanished. Leaving behind a vague set of clues for the Challengers to decipher to help bring him back. To incentivize the Challengers in assisting The Gamemaster on his quest, he created a special inventory at **"theoasisnft.eth"** specifically to reward those deemed worthy. There are secrets around every corner of The Oasis including right here ***Find the chest with infinite locks***. Acquire your unique Challenger token and become part of the community that holds the BEST giveaways in the metaverse.

The story will be developed through a series of YouTube and TikTok videos demonstrating what is happening simultaneously in the digital realm (animated videos) and they physical realm (live videos). The first of these can already be found at **TheOasisNFT.XYZ**.

3. Battle Map:

The Battle Map is 1 part Battle Pass – 1 part Road Map. The design philosophy of the game is simple: NEVER promise what we can't deliver, NEVER spoil the secrets. While we could sit here and promise to deliver the moon, we'd rather guarantee exactly what we will do, and surprise the community whenever we can. The Battle Map – is something we are guaranteeing to deliver... The surprises, well you'll just have to wait and see...

3. Battle Map continued:

1 Part Battle Pass – Just like a battle-pass from some of your favorite video games (Fortnite, Apex, Rocket League) there will be weekly rewards ranging in value. If you own a Challenger Token you will be eligible for the best loot available in The Oasis. If you don't have a Challenger token don't worry! We will be giving away a minimum of 1 Challenger Token to a member of our community who doesn't have one weekly! Additionally, each reward from The Oasis will have a "Challenger Track" (Challenger Token Required) and "Factionless Track" (No token required to win!).

1 Part Road Map – The Oasis is committing to deliver a minimum of 4 Seasons of content – collectively known as a Saga. Each season will consist of new lore chapters that are defined by the Challenger actions. This game will move quickly and new activities and challenges will emerge upon a moment's notice. Following all of the socials and being active in the discord will be necessary to win most activities.

The value of the rewards are directly based upon how many Challenger tokens have been minted.

***please note these figures are subject to change.**

Loot Tiers:

Bronze Tier:	0.01–0.09 ETH
Silver Tier:	0.1–0.99 ETH
Gold Tier:	1–2 ETH
Epic Tier:	2–5 ETH
Legendary Tier:	5–10 ETH
Secret Tier:	? ETH

4. Challenger Token:

3.333 Challengers Awaken from all stretches of the metaverse. How many references can you identify? These Challengers are your portal to The Oasis. Allowing you to enter the metaverse armed for all challenges that await you. Each Challenger is outfitted with its battle loadout to combat anything The Oasis throws at them. Each background is a setting within the story we are writing together. By owning a Challenger token you are granted access to the Legendary Quest, the highest value loot in The Oasis, exclusive events, alpha signals, private trading post, Challenger-only activities, Challenger-only rewards, real-life events, access to Merch, influence direction/collaboration of project, influence rewards, Challenger-only secrets...

5. 50% ETH Giveaway:

50% of the Eth raised from the initial sale of the Challenger tokens will be used to fund each tier of giveaways for both the Challenger and Factionless track rewards. The Challenger rewards will be much larger (~4X-10X) the value of the rewards given to the Factionless. There will be many instances where a Challenger will be able to enter a Factionless giveaway, but a Factionless player will never be able to enter a Challenger activity/giveaway.

6. Legendary Quest:

Prior to the timeline-reset and the disappearance of The Gamemaster, he mentioned something he called The Source. In his last message to the Challengers he indicated that it was located at the center of Atlantis City. When Dartanyan (the GM's insufferable associate) traced him back to AC - The Gamemaster was gone. The Source however was unveiled.

6. Legendary Quest continued:

A large towering and twisting structure nearing the size of Dappsule Corp. tower had emerged from the ground. An entrance lay atop the gleaming structure for all Challengers brave enough to enter. A platform with a diameter 100m wide with blue arch-locked circles lay afoot. The platform – high atop the spire beneath the ethereal Eth crystal resembled the mechanism of an elevator. It seemingly went to the ground level – and far below. The platform was not yet operational, and it was not yet known how to even activate the lift. As such, it was unknown just how deep the Inverted Spire went. 5 floors? 10? 100? All that the Gamemaster left behind was an illuminated message embedded into the most central point of the most middle circle that read:

“I know not when or if I will return. Unlock the Spire at 10,000 Awoken. A Legendary Quest awaits you. The prize is known. The trials and challenges that await, are not. Finally, and as always – Good Luck, Challengers...”

–The Gamemaster”

7. Drop Mechanics:

The miXed-Reality currency The Oasis runs on is known as Clout! To gain access to The Challenger Treaties (WL) you must become a Clout Chaser! Holding any of the below Clout tokens will grant you a chance to Mint the respective number of Challenger Tokens! These tokens are being given away everyday in our discord for absolutely free! (While supplies lasts) Or you can pick 'em up from the secondary market or The Gamemaster's shop theoasisnft.eth. To avoid gas wars at mint each of the holders of the respective tokens will have a 24 hour mint window to mint their Challengers. (Please Note: Having multiple of the same Clout token will not increase your WL allocation. I.e. having 10 Gold will still only allow you 2 allowed Challengers. Stacking Bronze however will give you better odds at winning the final raffle. Some of the top Bronze holders will also be gifted Challengers for free.

9. What are the rest of the funds from the Challenger Tokens going toward?

First off, to pay the amazing team of artists and devs behind the project. They have worked day and night to deliver The Oasis and have not yet been compensated. That changes ASAP. In addition to the team, the funds will be used to grow the project for longevity and success. From Day 1 we have 1 year of content planned that we are committing to. But what comes after that? The funds from the rest of the project will go towards further development of what The Oasis is, and will become. **NEVER promise what we cannot deliver, NEVER Spoil the Secrets.**
